

**INTRODUCING
NEW AND IMPROVED
CASTINGS!**

Metal Master®

Question: How do you make something **Lighter** yet **Stronger**?

Answer: **Innovative Design** using Solid Modeling Technology.

Reinforced Lock Master™ castings are strong. **Lighter than the previous casting.** Deepest working pocket available at 20"

Ergonomic full looping bending handles

Optional USA2EZ

Center-weighted, large heavy-duty ball bearing wheels "spin on a dime"

Model MM1065

Metal Master® 20 Contractor
Bends Aluminum up to .032 (3003H14)

Model	Length	Castings	Weight
MM260	2'0"	2	52 lbs.
MM460	4'6"	2	78 lbs.
MM660	6'6"	3	107 lbs.
MM860	8'6"	3	122 lbs.
MM1060	10'6"	4	148 lbs.
MM1260*	12'6"	5	194 lbs.

* Dual bending & locking handles
Please contact our factory for capacities on your specific metals.

Our new castings are **15% lighter** yet **20% stronger** than our original. Adds life to the casting and produces more precise bends.

Most Common Accessories

TrimFormer™ effortlessly form trim coil into beautiful and stronger architectural shapes. Optional crown molding & bead form dies are available.

TrimCutter™ cuts steel, aluminum, copper, and zinc. The brake uses dual-track system for all popular accessories.

Coil Dispenser™ protects trim coil and keeps it rolled tight while still allowing the material to be dispensed. An accessory that pays for itself quickly.
